Dedicated Salesforce developer seeking a challenging position within an organization to advance my knowledge, refine my skills, and contribute to a dynamic team committed to organizational growth. Aiming to gain valuable experience in a stimulating work environment.

## ▼ Experience

---

### Premium Internship Program | Premium Learning Systems, Pune- December 2023

#### 1. Automated Business Processes:

Developed projects in Salesforce to make day-to-day tasks smoother and maintain data accuracy for that I used the flows and APEX Triggers.

#### 2. Lightning Web Components (LWC):

Created good-looking and easy-to-use interfaces using Lightning Web Components (LWC).

#### 3. Connected Salesforce with Third party system:

Made Salesforce work seamlessly with other tools by linking them together using APIs and fetched the data from third party system to salesforce.

#### 4. Worked on Latest Salesforce Technologies:

Used the newest Salesforce technologies, like Lightning Web Runtime (LWR), for various projects so that projects are available outside the salesforce.

## ▼ Education

---

### Bachelor of Engineering (BE) in Electronics and Telecommunication (E&TC)

Sandip Foundation, Nashik, Maharashtra.  
Savitribai Phule Pune University.

### Diploma in Electronics and Telecommunication (E&TC)

Government Polytechnic Nashik

## ▼ Skills and Proficiencies

---

### Web Technologies

- HTML
- CSS
- Bootstrap

### Programming Languages

- Java
- JavaScript
- Apex

### Salesforce Configuration

- Salesforce Administration
- Validation Rules
- Flows
- Apex Trigger
- Lightning Web Component (LWC)
- SOQL

## ▼ Achievements

---

- Trailhead Double Star Ranger
- 5 super badges on trailhead

## ▼ Projects

---

### 1) Project Management Application:

Developed a project management application in Salesforce, involving the creation of models and triggers for efficient project tracking. In this when new project record is created email is send to Project manager and client regarding the project details. Also, it assigns a task to employee for gathering the requirements and to do analysis for the project.

### 2)Wellness Calculator Application:

Implemented a wellness calculator software application that calculates a person's BMI based on their weight and height. Executed this project using LWR and Lightning Experience, providing a new way of interaction within the organization.

### 3) Hotel Reservation Management Application:

Designed and developed a hotel reservation management application in Salesforce, encompassing the creation of a data model, business process automation, Apex triggers, asynchronous Apex, and Lightning Web Components (LWC). The reservation object keeps track of all reservations made by customers in the hotel. It sends an email when a new reservation is created and when that reservation is extended. A Chatter post is made when a new reservation is created, visible only to the manager.

#### **4)Smart Alarm Clock:**

The application allows users to create, stop, snooze an alarm, trigger the alarm to ring with a ringtone and animation, and stop the alarm. The ringtone and animation logic can be customized based on your specific requirements and the capabilities of the chosen libraries or technologies.

#### **5)Weather Forecast Application:**

Contributed to the creation of a user-friendly weather application with client-server API integration. Delivered real-time weather information based on the selected city. The project comprised two main components: the client-side app and the server-side API, seamlessly working together to provide accurate weather data.

#### **6)ChatGPT Integration:**

The "LWC ChatGPT Integration" project involves seamlessly incorporating the ChatGPT language model into Lightning Web Components (LWC) project. The objective is to create an interactive and dynamic chat application within the Salesforce ecosystem, enabling users to engage in natural language conversations powered by ChatGPT.

#### **7)Quick Note-Taking App:**

The "Quick Note-Taking App" is a digital Application designed to help user easily capture, organize, and manage their notes in a convenient and efficient manner. Whether for personal use, academic purposes, or professional tasks, the app provides a user-friendly interface.

#### **8)Portfolio Builder:**

The "Portfolio builder" provides relevant information to potential employers about candidate's skills, experience, and projects you have worked on. Portfolio builder is like one's online resume. Potential clients and hiring managers can easily find candidate online and check out candidate's previous projects and skills.
